Strategic Building of the Executive Unit

Strategic Building of the Executive Unit

The Executive Unit hope to more professional and more developed administrative body to address displacement and camps management in accordance with international standards and in line with the requirements of national visions and policies. The unit's strategic objectives are embodied in accordance with the national policy to address internal displacement in the Republic of Yemen as follows:

- Protect civilians from involuntary displacement and prepare for any possible displacement.
- Protect and assist IDPs during displacement and support communities affected by displacement.
- Create appropriate conditions for safe, voluntary and durable solutions to displacement.

The Vision

Professionalism in dealing with displacement and managing displacement camps in accordance with national and international standards.

Mission

An integrated and effective response to displacement in Yemen that emphasizes the rights of IDPs and the responsibilities of the authorities towards them based on transparency, accountability and confidentiality to ensure the provision of high-quality services.

Valus

Transparency

Availability of all information about regulations and statistics on displacement, camps, IDPs, humanitarian aid of all kinds and forms, intervening organizations, and facilitating access to information.

Responsibility & Accountability

The Executive Unit is actively committed to placing all its leaders and employees at all levels in accountability to society Ensure the quality of the response and provide relevant results, acknowledge any failures or errors that occur while doing so and take full responsibility.

Confidentiality of personal data

Confidentiality of personal data: The Executive Unit ensures that the personal data of the displaced that has been collected by the unit is kept confidential, and that it is not published or enabled by any party to access it except with the consent of the IDPs.

Quality

It is a set of characteristics and specifications that characterize the services provided by the executive unit to the displaced, and that meet the expressed and implicit desires and requirements of stakeholders in the appropriate time and form.

Introduction

The Executive Unit for the Management of IDPs Camps in Ma'rib Governorate worked through the annual report for the year 2021 AD, which covers all humanitarian activities and efforts done by the Executive Unit in all humanitarian and relief sectors in the governorate. The unit faced many challenges and great pressures in addressing the issues of internal displacement and forced displacement.

Especially with the exceptional circumstances that the governorate is experiencing, with very sensitive and fragile services and infrastructure, and the accompanying large and unprecedented waves and flows of displacement, which led to great pressure on the meager basic services. The unit was able to reach all the displaced people in the governorate, arrange their conditions, and conduct surveys and assessments for all needs communicate with all humanitarian partners, including local and international organizations , and providing them with all information support, arrangement and facilities for urgent and safe access to all affected communities and the sites and IDPs gatherings. The unit contributed to introducing the humanitarian situation through meetings, reports, humanitarian appeals and emergency messages to humanitarian and relief agencies, clarifying the humanitarian file, needs and challenges in the audio-visual media, and mobilizing all efforts to provide life-saving humanitarian services

The great challenges that Marib Governorate faced and the constantly violations caused by the terrorist Houthi militia and the accompanying displacement have made us all on the top of humanitarian responsibility.

We thank all humanitarian partners for providing humanitarian projects and assistance that helped alleviate the suffering and tragedy of the displaced. However, in the current year 2022 AD, we must as a whole redouble efforts to cover the gap in the basic needs of the displaced families in Ma'rib Governorate..

Manager's Speech

Saif Nasser Muthanaa

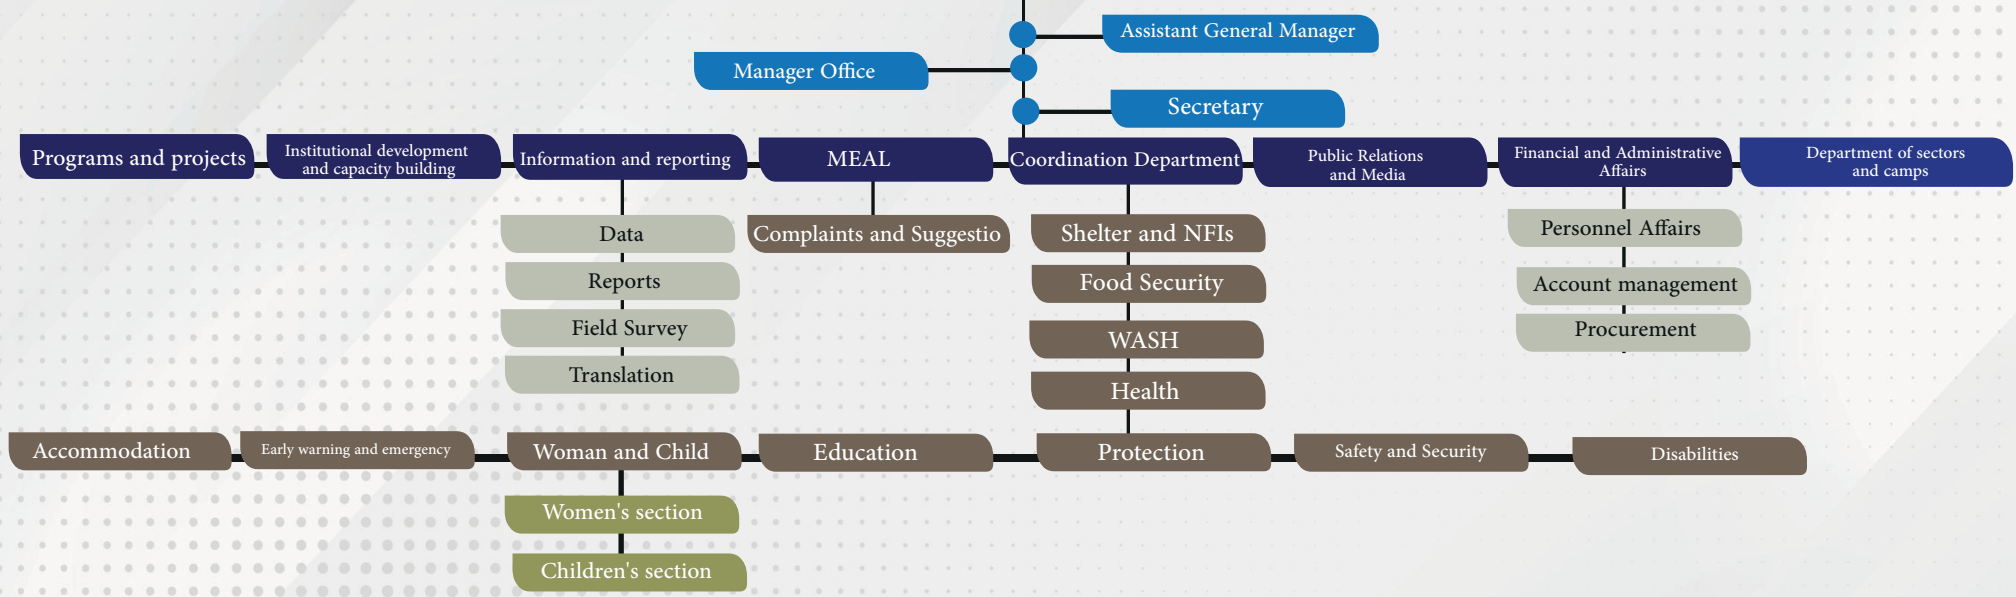

General Director

During the past year 2021 AD, the Executive Unit for the Management of IDPs Camps in Ma'rib Governorate made all efforts to make the humanitarian operation successful in Ma'rib governorate, as a result of the emergency and exceptional circumstances that the governorate has been experiencing over the past years due to the systematic process, the continuous escalation, and the violations committed by the terrorist Houthi militia against the residents of the governorate, including the IDPs and the Host community. That resulting humanitarian reality exceeds the capabilities of the local authority, However, with all effort and determination and under the generous patronage of Major General by Sheikah Sultan Al-Arada, Governor of the Governorate, Chairman of the Local Council, and all sectors and official offices, we worked to mobilize efforts and make necessary arrangements to overcome part of the severity of gaps and humanitarian needs in light of continuity of the emergency waves of displacement, in which we worked with patience and dedication with all the Unit staff to carry out the process of monitoring, tracking and recording all displaced families. We have shown the difficult humanitarian conditions in the governorate, and the required support and assistance in this stage from all partners and humanitarian workers inside and outside the governorate. Over the time, the Executive Unit has been the link between organizations and families in need through communication, continuous facilitation, providing necessary assistance, and raising needs. In addition, the Unit arranged the management of sectors, sites, and IDPs camps, appointed male and female community committees, built and raised the capacities of field workers, and held many periodic and coordination meetings to ensure an understanding of humanitarian action standards and carried out many fields work in the IDPs sites and camps.

As we review 2021 Performance Report, we would like to extend our thanks and appreciation to all those who contributed and helped in the success of our action .Official and civil bodies and local and international organizations, and thanks are extended to all workers in the Executive Unit and sectors, sites and camps management, who made all their efforts and time for the sake of success of humanitarian task entrusted to all of us. In this new year, 2022, we hope that all local and international humanitarian partners, to provide a lot of humanitarian support, redouble efforts, and keep pace with everything that would distinguish and advance our humanitarian work, administratively and on the ground, to help and save the lives of thousands of displaced families.

Needs

Urgent Needs in Rapid Response

- **Emergency response and provision of urgent humanitarian aid to newly displaced families.**
- **Providing life-saving interventions for newly displaced families in all humanitarian fields.**

Emergency Recommendations in Rapid Response

Expansion of partners with an increase in working teams to facilitate and speed up the emergency response process.

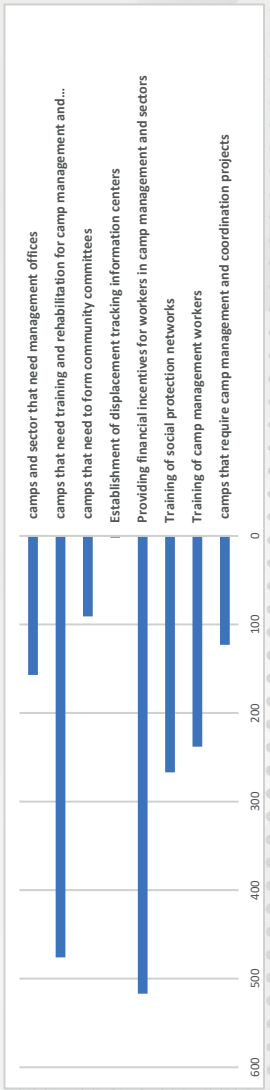

Opening an office for the United Nations Population Fund (UNFPA) in the governorate.

Creating an emergency stockpile to cover the ongoing need for displacement and to facilitate the exchange mechanism.

Rapid response to new displaced families and covering their needs.

Improving the quality of the contents of the emergency bag and selecting better samples due to the poor quality of some materials.

Emergency needs in the CCCM Sector

Emergency needs in the CCCM sector

| camps and sector that need management offices | camps that need training and rehabilitation for camp management and community committees | camps that need to form community committees | Establishment of displacement tracking information centers | Providing financial incentives for workers in camp management and sectors | Training of social protection networks | Training of camp management workers | camps that require camp management and coordination projects |
|---|--|--|--|---|--|-------------------------------------|--|
| 157 Office | 476 Volunteer | 91 Site | 2 Center | 517 Volunteer | 267 Member | 238 Volunteer | 123 Site |

Emergency recommendations CCCM Sector

- Expansion and approval of camp management and coordination in locations where there are no CCCM partners .
- Training, rehabilitation and capacity building of workers in sectors and camps management.
- Providing incentives for camp management workers.
- Establishing an information center to track displacement in the governorate.
- Establishing community centers in sectors and camps.

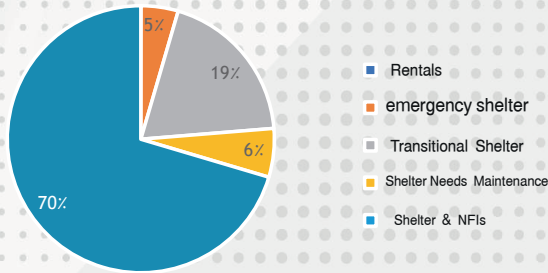

Emergency needs in the Shelter and Non-Food Items Sector

Emergency needs in the Shelter and Non-Food Items Sector

| Shelter & NFIs | Shelter Needs Maintenance | Transitional Shelter | emergency shelter | Rentals |
|-------------------------|---------------------------|-------------------------|------------------------|-------------------------|
| 92,913 Family | 11,276 Family | 46,754 Family | 8,620 Family | 42,615 Family |

Emergency recommendations in the Shelter and Non-Food Items Sector

Emergency needs in the Shelter and Non-Food Items Sector

The necessity of providing adequate assistance to cover the basic precautions for the camp residents, including shelter .

Finding an appropriate mechanism to deal with emergency incidents in the camps, such as fires - floods, and rapid response to them.and Non-Food Items, in accordance with the climatic and social conditions of the province.

Urgent response and provision of humanitarian aid to displaced families living in rented houses.

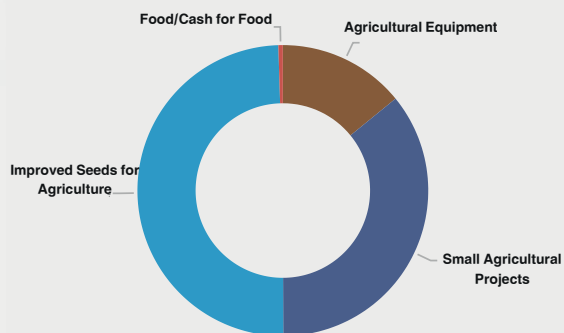

Going on two tracks and providing sustainable and emergency shelter needs.

Emergency needs in the food and agricultural sector

Emergency Needs in the Food and Agricultural sector

| Small Agricultural Projects | Agricultural Equipment | Improved Seeds for Agriculture | Food/Cash for Food |
|-----------------------------|------------------------|--------------------------------|--------------------|
| 6,253 Family | 2,463 Family | 8,646 Family | 86,422 Family |

Emergency recommendations in the food and agricultural sector

Working to meet the gaps and needs in the field of food and agriculture, and work to quickly include displaced families who did not receive food in the monthly food quotas of the World Food Program.=

Working on adopting income-generating projects that help the displaced to provide food security on self-reliance.

The importance of considering the components of the monthly food ration provided by the World Food Program and taking into account the actual and appropriate need for the family's needs of varied and sufficient food.

Using the voucher method for monthly food rations, so that the family has the freedom to choose the materials from the merchant for the amount specified by the donor.

.Going on two tracks to provide emergency and sustainable needs in the agricultural sector

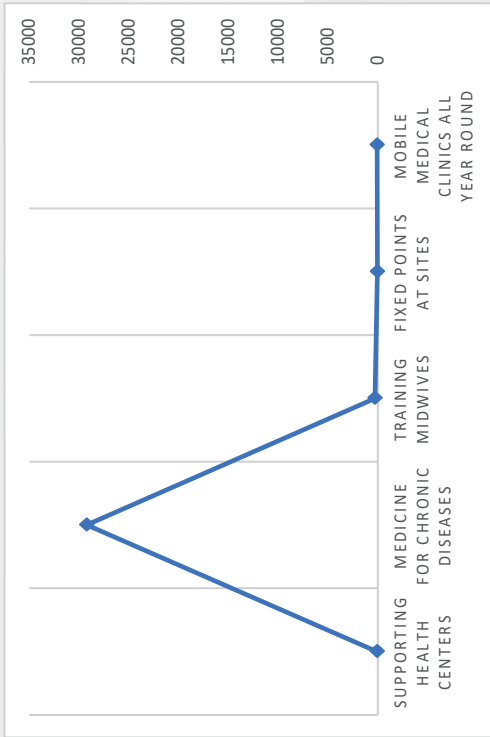

Emergency needs in the WASH sector

| Emergency needs in the WASH sector | | | | | | | | | |
|------------------------------------|--------------|----------------|---------------|-----------|--|--------------|---|----------------|----------------|
| Bathrooms | hygiene bags | sewage suction | Waste Removal | Boreholes | Rehabilitation & permanent water sources | water points | Family water tanks capacity 1000 liters | Water for use | Drinking water |
| 16,617 | 146,420 | 5,328 sewage | 265 site | 76 Site | 316 source | 1,742 Point | 47,611 family water tank | 121,316 Family | 153,545 Family |

Emergency recommendations in WACH Sector

- Work to find an effective means of obtaining safe drinking water for all IDP camps.
- supporting the Public Water Corporation and the Rural Water Authority and providing them with capabilities and technical support.
- Rehabilitation and expansion of the main water sources, focusing efforts on sustainable projects, and linking the sites of the displaced to permanent water sources.
- Supporting Cleanliness and Improvement Office and providing it with the necessary equipment and means to help improve waste hygiene and waste disposal.
- Continuing in the two tracks: emergency needs and sustainable needs in the water and environmental sanitation sector.
- The importance of finding a project to address the escalating sewage problem in the Marib.

Emergency needs in the health sector

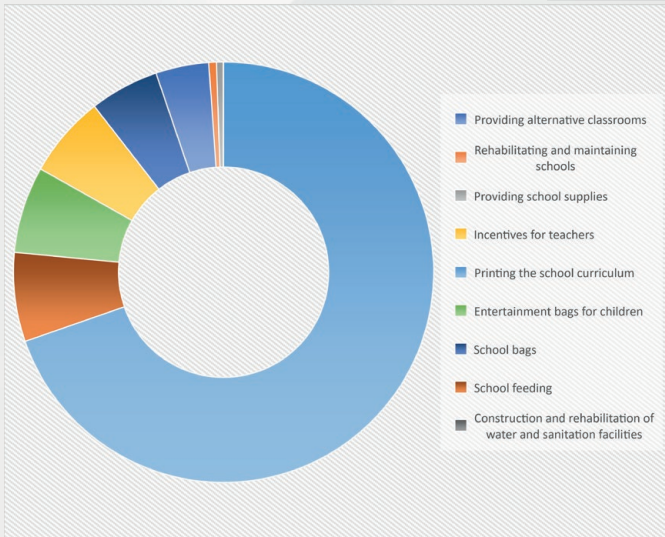

| Emergency needs in the health sector | | | | |
|--------------------------------------|-------------------------------|-------------------|------------------|---------------------------------------|
| Supporting health centers | Medicine for chronic diseases | Training Midwives | Fixed points | Mobile medical clinics all year round |
| 47 center | 29,214 patient | 267 Midwife | 20 Medical point | 22 Mobile clinic |

Emergency recommendations in the health sector

- Providing technical and material support to the Health and Population Office in the governorate to increase the effectiveness of existing health facilities, improve their services and supply them with the necessary supplies.
- Work to make health services available and easy to access from the camps and take care of the health of the mother and child.
- Establishing a mental and psychological center in the governorate due to the dire need for it.
- Establishing a center for burns and cosmetic medicine due to the large number of fire incidents in the camps.
- Adopting the provision of urgent assistance for referrals and emergency health cases.
- Supporting health centers and facilities to provide permanent services.
- Training and qualifying midwives in the displaced sites.

Urgent needs in the education sector

| Urgent needs in the Education sector | | | | | | | | |
|--|------------------|------------------|---------------------------------|--------------------------------|-------------------------|---------------------------|--|----------------------------------|
| Restoration and construction of bathrooms in schools | School feeding | School bags | Entertainment bags for children | Printing the school curriculum | Incentives for teachers | Providing school supplies | Rehabilitating and maintaining schools | Providing alternative classrooms |
| 467 | 184,615 Child | 143,752 A bag | 6,820 A bag | 1,880,400 Books | 3,455 Teacher | 1,684 Classroom | 68 School | 568 Classroom |

Emergency Recommendations Education Sector

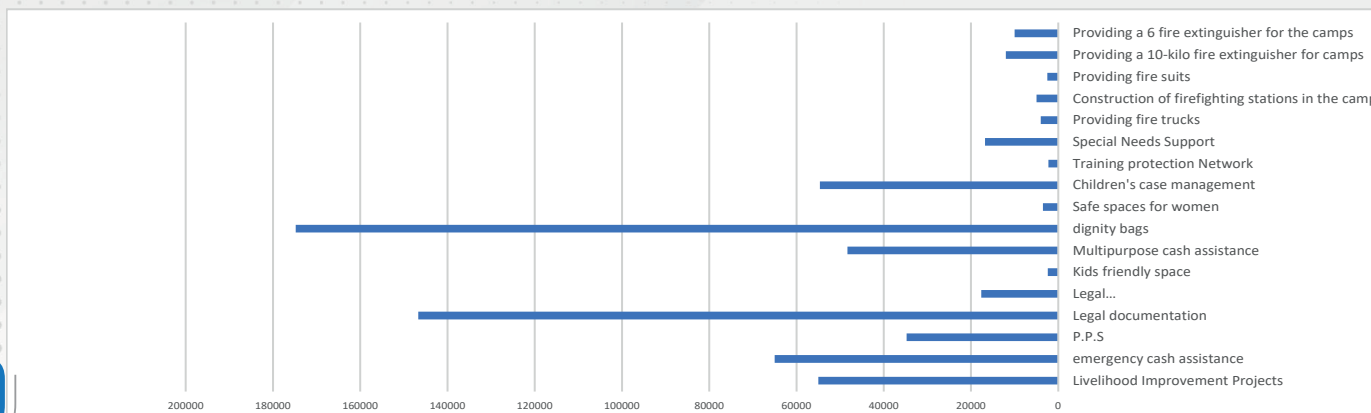

- Directing efforts towards finding good and appropriate educational opportunities by supporting the Education Office with the necessary technical capabilities.
- Encouraging displaced families to provide their children with education and provide psychological and material support to provide an appropriate learning environment.
- Adopting school feeding for children in schools.
- Qualifying and training educational cadres, building their professional capacities, and providing financial support to ensure their continuity in the educational process.
- Work to establish new schools to keep pace with the large increase in enrollment in public education.

Urgent needs in the protection sector

Urgent needs in the protection sector

| Providing a kilo fire-10 extinguisher for camps | Providing a 6 fire extinguisher for the camps | Providing fire suits | Construction of firefighting stations in the camps | Providing fire trucks | Special Needs Support | Training protection Network | Children's case management | Safe spaces for women | dignity bags | MPCA | Kids friendly space | Legal Consulting | Legal Documentation | P.P.S | emergency cash assistance | Livelihood Improvement Projects |

Emergency recommendations CCM Sector

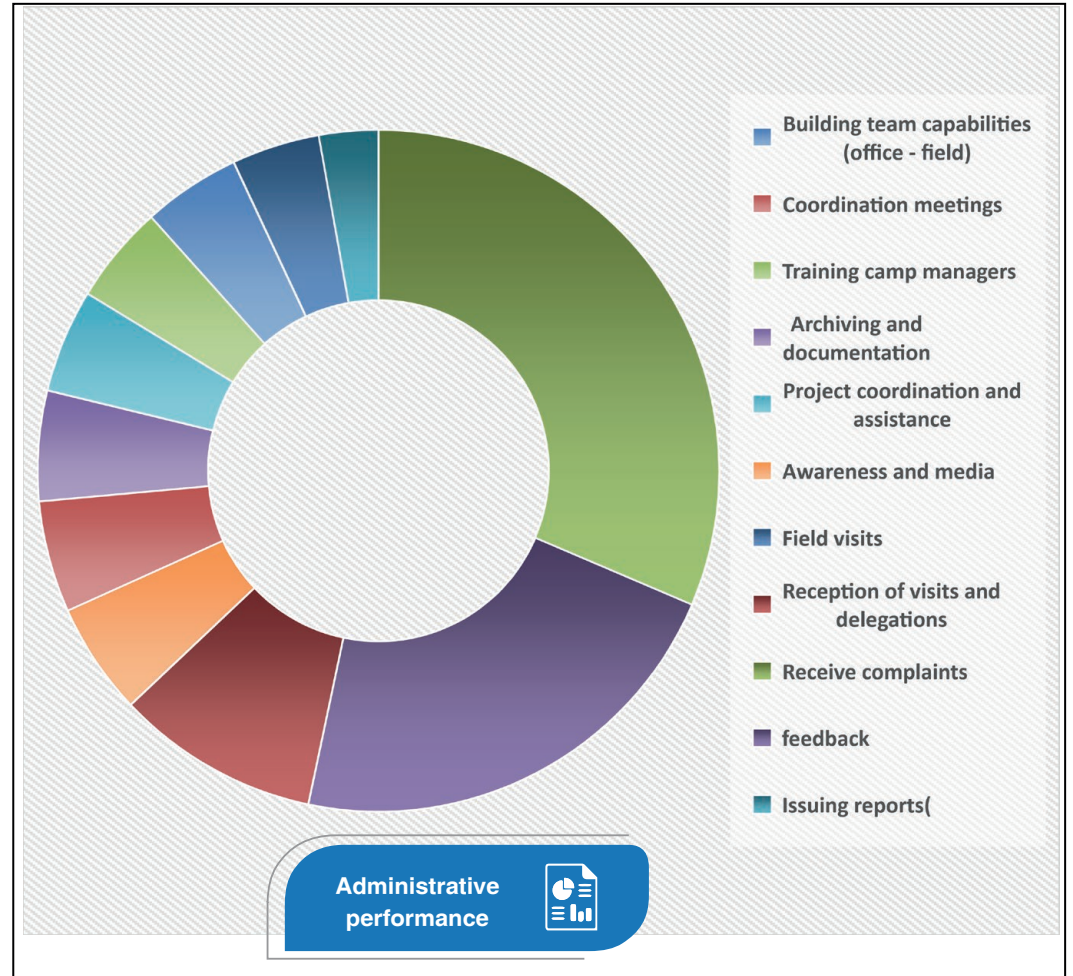

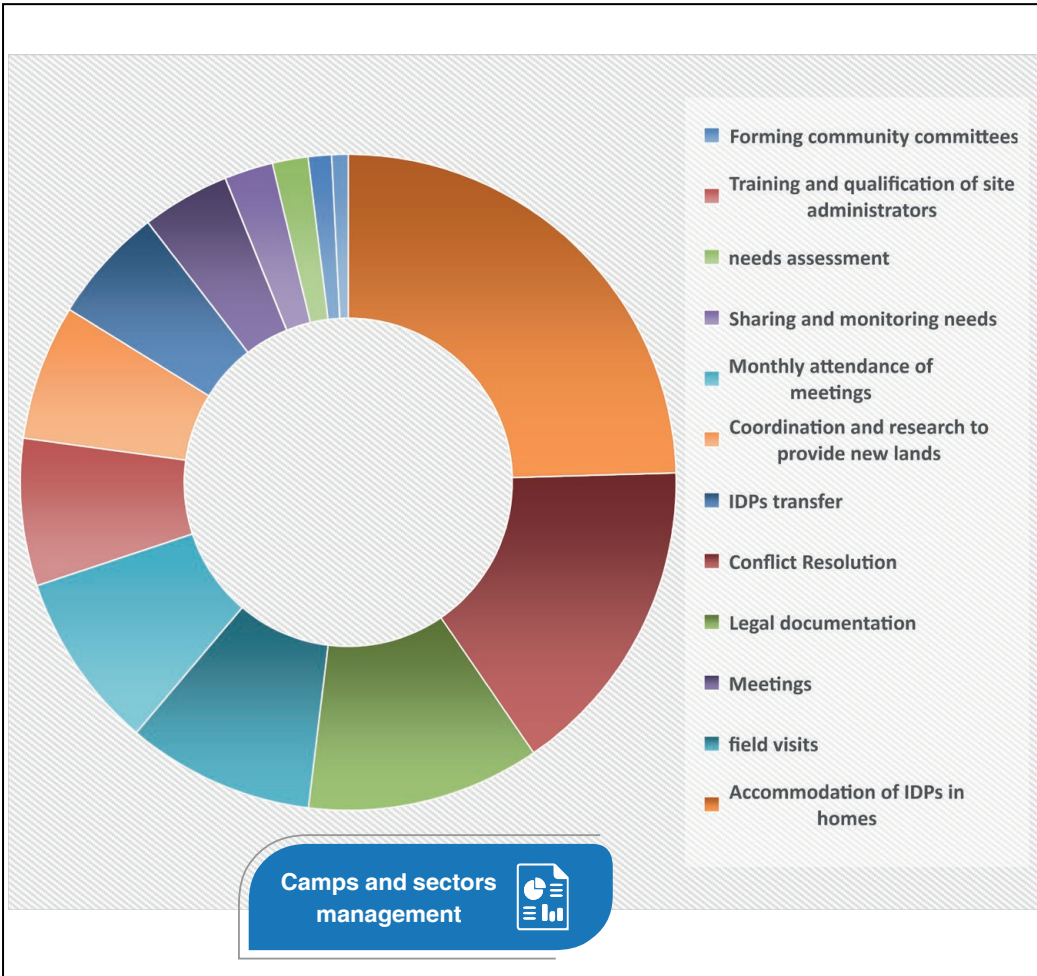

Activating the Protection cluster in Marib and expanding its interventions and activities in all protection Sector .

Providing adequate technical support to the Civil Status Authority and facilitating the displaced people's access to legal documents.

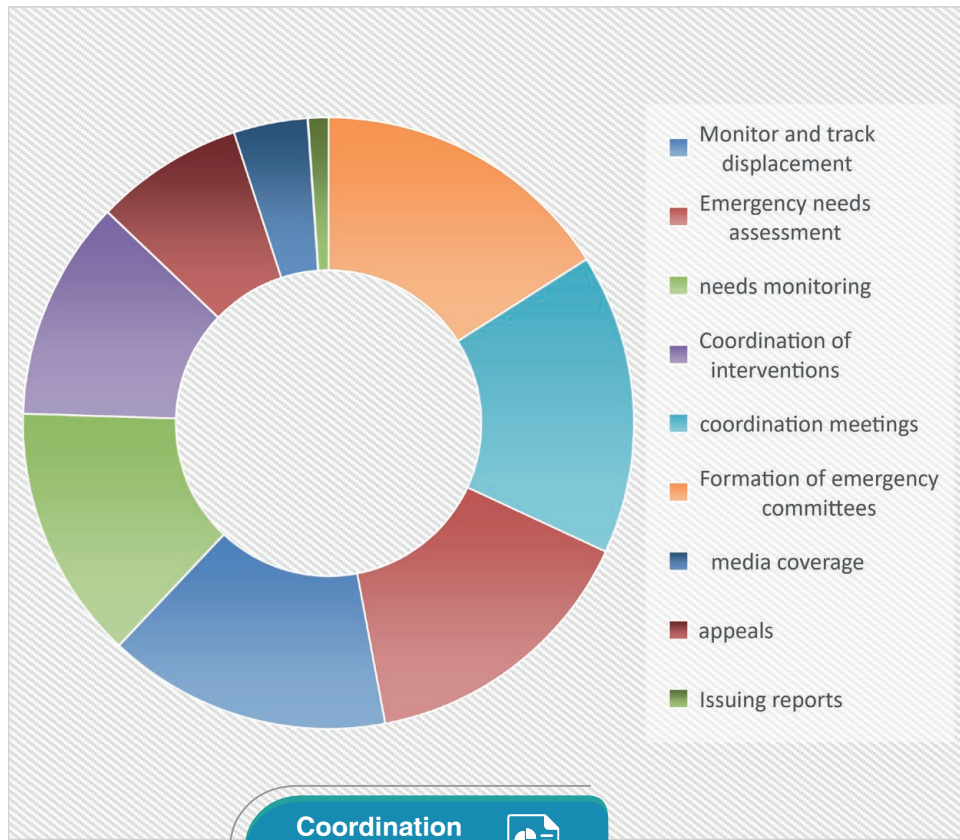

Focusing on providing psychological, legal and material assistance to the most needy and vulnerable groups in society.

Providing livelihood projects for families that do not have sources of income.

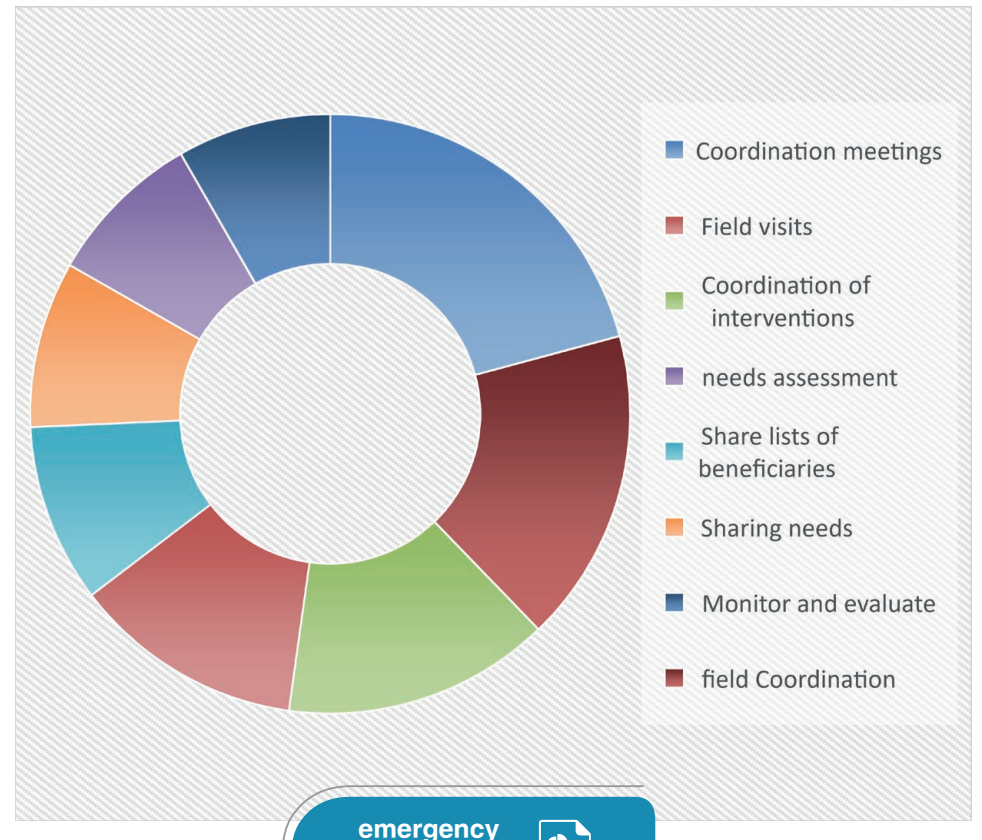

Performance

Performance

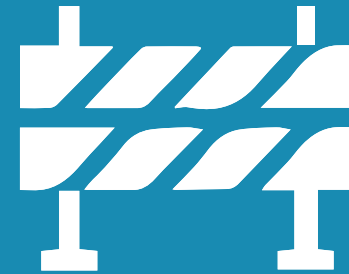

Coordination and Intervention

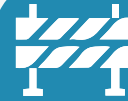

emergency situations

Challenges

External Challenges

Challenges

Ignoring the request for the adoption of Ma'rib Governorate as a financially and administratively independent humanitarian center to estimate the level of the large displacement in the governorate

Weak participation of the competent official offices in planning humanitarian projects in various fields of importance and directing donor funding to projects of the highest priority

The weak response in the sectors of food security, shelter, NFI, health, education and protection by international and local partners, compared to the size of displacement and need in the governorate

Procrastination by UN and international organizations in approving the correct numbers for the population in the governorate issued by the official offices in the governorate (Statistical Office - Executive Unit Office -Planning Office) and receive information and reports from non-official bodies.

Humanitarian agencies' adoption of incorrect indicators of the severity of needs in several sectors, including health, which surprised us by placing Marib Governorate in the second degree, and Marib is supposed to be in the extreme degree of need This has led to the governorate being at the bottom of the humanitarian response lists, which puts OCHA, the humanitarian coordinator, and the UN agencies under suspicion and accountability

Most of the partner international organizations do not have major branches in the governorate to adopt integrated projects according to needs, which made their interventions limited and meager.

Internal Challenges

There is no operational budget for the executive unit office in the governorate.

There is no reserve stock for emergency interventions subject to the executive unit and the cluster in the Ma'rib governorate to face the continuous and intense waves of displacement and consumer needs.

There are no state-owned lands to house the newly displaced, because the governorate receives displaced people on a continuous basis, and there are camps that have been established in government facilities, and they need urgent treatment to provide alternative places.

Recommendations

Recommendations

- 1** The necessity of approving Marib as a humanitarian center that is financially and administratively independent, has all powers and is subject to attention and activation.
- 2** The significance of UN and international organizations carrying out their humanitarian responsibilities, and opening offices in the governorate for non-existent organizations, whether from UN or other international organizations
- 3** The significance of the presence of blocks that did not exist in the governorate, especially the protection block, and the activation of existing sub-blocks
- 4** We hope the government will mobilize efforts to provide a reserve stock for emergency interventions subject to the Executive Unit to confront the ongoing waves of displacement.
- 5** We call upon the International Committee of the Red Cross to enhance its active presence and raise the level of its interventions in Marib Governorate
- 6** Participation of the specialized offices in planning humanitarian projects in various fields of importance and directing donor funding to highest priority projects.

Recommendation

7 Approving an operational budget for the office of Executive Unit in Marib Governorate.

8 Finding an adequate mechanism to address the situation of displaced families in service facilities and working to find alternative sites.

9 We hope that the government finds lands to build a residential city to accommodate the needy displaced people, since the governorate is receiving continuous displacement.

Opening of the Residential City of the Pure Hands

Conclusion..

We hereby have reached the conclusion of the report, as it should be noted that the report was prepared with the efforts of all and was prepared to summarize activities undertaken by the executive unit in areas related to its competence and tasks.

Data and statistics of population in Marib Governorate were collected from official offices. The report included the most prominent performance indicators and briefly reflected the executive unit's role during the past year and its ability to coordinate and facilitate the delivery of humanitarian aid, fill the basic gaps, and direct the humanitarian response process from partners to displaced families according to priorities and needs. In the interest of highlighting efforts exerted for all, the report includes all achievements and works undertaken, and mainly reflects urgent humanitarian needs as clarified in their detailed part. During the past year, the Executive Unit worked closely with all humanitarian agencies to support all efforts aimed at addressing humanitarian conditions of displaced persons.

The report addressed the most important statistics and figures surrounding humanitarian work in Marib governorate in particular. The report highlighted a set of challenges and recommendations related to all humanitarian issues in the governorate, which we hope to implement. Hopefully, we have succeeded in this action, thanking all efforts exerted to accomplish it, and we call on everyone to give more to serve humanitarian work and to stand against displacement crisis and its conditions and challenges in Marib governorate.
